OBJECTIVE

I am seeking opportunities to develop my backend skills and strengthen my proficiency in Java and Python. I aim to apply my knowledge to building RESTful APIs, working with databases, and gaining hands-on experience in developing efficient and scalable systems.

EDUCATION

Bachelor of Information Technology	2023 - present
FPT University, Hoa Lac	GPA: 3.0/4.0

TECHNICAL SKILLS

Languages	Java, Python
Backend	Spring Boot, RESTful APIs
Web	HTML, CSS, JSP/Servlet
Database	PostgreSQL, SQL Server
Tools	Git, Postman
Core	Data Structures & Algorithms
Concepts	OOP, MVC Architecture

PROJECTS

HRMS (Human Resource Management System)

Recruitment Module

Jan 2026 - Mar 2026

- Implemented JWT-based authorization to enforce strict Role-Based Access Control (RBAC) across diverse user roles.
- Designed and implemented the data access layer using JPA/Hibernate, including entity mapping and query optimization.
- Developed an email notification service for candidate communication throughout recruitment stages.
- Implemented PDF file handling for storing and retrieving candidate CVs.
- Implemented automated status transitions based on time and quantity constraints, minimizing manual intervention and improving system consistency.
- Designed and implemented interview scoring logic by aggregating evaluations from HR and hiring managers.
